

# Developing Best Practices of Community Engagement for Genomics and Biobanking in Africa (CEBioGen)

**The Goal:** To investigate the role of community engagement in genomic research and biobanking in sub-Saharan Africa.

## The Problem

Genomic research raises important ethical questions such as the appropriate consent models for the use of archived samples, data sharing, privacy and confidentiality, how communities should be engaged in the research process and how to communicate genetic results to research participants. Although these questions have received considerable attention through academic discourse and empirical research, very little attention is given to the question of what should count as the best ethical practice in communicating genomic research results particularly in Africa.

## Project Strategy

1. To investigate the role of community engagement (CE) in genomic research and biobanking in sub-Saharan Africa by conducting collaborative research projects across four African countries: Ghana, Nigeria, South Africa, and Kenya.
2. Elicit key stakeholders' views on the value and purpose of CE in genomics.
3. Examine the key ways in which local communities should be involved in genomics and biobanking in Africa.
4. Identify core competencies that are required for best CE practices.
5. Serve as a training and resource center for ethics and CE to support the implementation of genomic research across sub-Saharan Africa.
6. Provide short and long-term training opportunities.

## Outcomes & Impact

- Conducted empirical studies with key stakeholders across six research sites in West, East and South Africa.
- Developed a short course on communicating genetics and genomics results to participants and communities.
- Organised workshop on community engagement.
- Training 3 PhDs and 2 Masters in Public Health and Ethics.
- Developed a video clip on *Journey of my sample*.

## Project Leads

**Dr. Anita Ghansah**  
Noguchi Memorial Institute for  
Medical Research  
aghansah@noguchi.ug.edu.gh

**Dr. Paulina Tindana**  
University of Ghana School of  
Public Health  
ptindana@ug.edu.gh

## Project Sites

**A: Ghana**  
University of Ghana School of Public  
Health, University of Ghana Medical  
School, Navrongo Health Research Centre

**B: Nigeria**  
University of Ibadan, University of Nigeria

**C: Kenya**  
African Population and Health Research  
Center

**D: South Africa**  
Agincourt Health and Demographic  
Sureveillance Site, University of  
Witswatersrand

**Non-African Collaborators:**  
University of Arizona
